**Esteemed Institutes.**

Respected Sir,

*APT-TECH* symbolizes the epitome of a desire to excel and systematize operations in an industry characterized by serious lack of structure and systems. *APT-TECH* current area of operations encompasses training students for Campus Placement Training (Aptitude and Soft skills) according to various corporate. Other than this, we also provide Corporate Training in various companies.

After brainstorming with individuals from the leading corporate & trainers, we realized the present loop holes in this unstructured segment of training and then with our rich experience and rigorous research work, we have designed a training module to enable the students to crack aptitude and interaction round (GD/PI) with ease & can finally realize their and our dream of getting the right job. Hence, *APT-TECH* was born on the 28<sup>th</sup> of May 2011 in Kolhapur. We have trained more than 10000 students so far with excellent placement results.

We have designed the package for students registered at your institute, studying in third year & students and those who will be appearing for campus recruitments in the near future.

Looking forward to receive your confirmation, I thank you once again for extending this opportunity to work with Karmaveer Bhaurao Patil College of Engineering, Satara to me and I assure you of best services at all time.

With regards  
Mr. Sanir Kittur  
Director APT-TECH

Course Title: Industrial Automation (Write lead college proposed name)

Course period: 5 Dec 2017 to 9 Dec 2017

Total Proposal budget: Rs 47,700/-

Total Expenditure incurred: Rs

Course sanctioned by Lead college committee in meeting MOM ref No. Dated:

The course/workshop on Industrial Automation, started on 5<sup>th</sup> Dec 2018 and completed successfully on 9<sup>th</sup> Dec 2017. Total 49 participants registered including faculty, along with students from surrounding institutes.

The intension of this course was to bridge the gap between syllabus contents and industry requirements. Industries largely work with automated systems. PLCs are inherent controllers used for automation. The syllabus do not focus much on this one of the requirements hence separate course / workshop was proposed under lead college scheme of Shivaji University Kolhapur. The organizers of course are thankful to the lead college committee for approving the course.

The lecture and hands on practice sessions were part of course and is conducted by experienced faculty in the institute and by people from industry. Involvement of industry experiences people proved more beneficial to the participants that gave them the insight of work requirements in industry.

The Electronics department of this institute contributed a lot for making available the equipments like Mitsubishi PLCs, Control accessories, variable frequency drives, Induction motors, Computers and softwares to enable participants for hands on practice.

The coordinators express their sincere thanks to faculty and staff of Electronics Engineering Department, Head of Electronics Engineering Department and Principal, Karmaveer Bhaurao Patil College of Engineering, Satara for extended cooperation

Q.40]

```
a = 4.5
```

```
b = 2
```

```
print a//b
```

Answer: 2.0

Explanation : This type of division is called truncating division where the remainder is truncated or dropped.

Q.41]

```
a = True
```

```
b = False
```

```
c = False
```

```
if a or b and c:
```

```
    print "GEEKSFORGEEKS"
```

```
else:
```

```
    print "geeksforgeeks"
```

Answer: GEEKSFORGEEKS

Explanation : In Python, AND operator has higher precedence than OR operator. So, it is evaluated first. i.e, (b and c) evaluates to false. Now OR operator is evaluated. Here, (True or False) evaluates to True. So the if condition becomes True and GEEKSFORGEEKS is printed as output.

Q.42] Consider the following three C functions :

```
[P1] int * g (void)
```

```
{  
    int x = 10;  
    return (&x);  
}
```

```
[P2] int * g (void)
```

```
{  
    int * px;  
    *px = 10;  
    return px;  
}
```

{
    int *px;
    px = (int *) malloc (sizeof(int));
    *px = 10;
    return px;
}
```

Which of the above three functions are likely to cause problems with pointers?

- (a) Only P3
- (b) Only P1 and P3
- (c) Only P1 and P2
- (d) P1, P2 and P3

Answer: (c)

Q.43] The number of tokens in the following C statement.

```
printf("i = %d, &i = %x", i, &i); is
```

- (a) 3
- (b) 26
- (c) 10

**Subject: Proposal for Training for Course on 'Certification in Estimation and Planning'**

Sir,

We are pleased to introduce our self as a premier service provider to the construction industry, serving their continuously changing needs and requirement in the area of Project Management. **infini has opted a center recognition from EAL, UK (Excellence, Achievement and Learning)**. At infini institute it is our endeavor to solve the construction industries' workforce dilemmas by training them into competency enhancement and value education. It is indeed our pleasure to present ourselves as a Software Training Centre, specialized in giving trainings in construction management to the corporate officials. You can trust upon us as provider of training in the area of Estimation, Project planning, scheduling, monitoring and controlling of project resources and cost.

Today, the construction industry is in dire need of skilled, reliable and competent work force, at all levels, to best handle today's challenges in the globalized sector. With the advancement in the field, the gap between industry and institute has increased. It is our general observations that being a qualified Civil Engineer, they are unable read a drawing, visualize a bar chart, find quantities, BBS, BOQ and budget. They are lacking in basic planning, Handle labors, measurements and billing etc. ...Then what role are we expecting to handle as a 'Civil Engineer'? This calls for a dire need of imbibing necessary technical, function, software and soft skills.

**Training needs identified:**

The sole purpose is to train students in Estimation and planning is to calculate all building quantities with the help of excel and AutoCAD, prepare schedule by using MS project software. Further, upon sufficient field exposure and additional advanced training, they can use the software for project cost & time control followed by analysis of delay.

**Quality policy:** To impart need based training to the fullest satisfaction of the participants.

**Commercials for Estimation and Planning Program:**

Duration of training: Seven days, 7 hour per day.

For a batch up to 20 candidates, Rs. 4700/- per candidate.

For a batch of 21 to 30 candidates, **Rs. 3850/-** per candidate.

**Term and Conditions:**

1. 50% of the total amount shall be paid before start of program and remaining before completion of program.
2. Cheque shall be drawn in favor of infini Institute of Program Management P. Ltd., payable at Pune or by net banking.
3. Certificates will be issued to participant who will successfully complete the program with desired level of performance.
4. Training material –Instructional manual in hard copy format – 1 copy for group of 5 students. Extra copies can be purchased at actual cost of Rs. 850/- per copy. Assignments will be in online format.

**Infrastructural facilities & support:**

1. Organization has to ensure well equipped laboratory with sufficient PCs / laptop. Autocad, Microsoft Excel, Microsoft Project shall be installed on it.
2. LCD projector and white board.
3. Collar mike and audio system is preferred.

**Instructor:** Prof. Baliram Ade and Mr. Nikhil Agrawal (Profile is enclosed)

This proposal is valid for a month's period from its submission.

Thanking you and regards,

Sub: Proposal to conduct Software training program in  
STAAD Pro V8i to a group of sem. 8 students by  
M/s. Dexter Technology Solutions, Pune.

M/s. Dexter Technology Solutions, Pune has submitted a proposal to conduct software training programs in our own laboratory for our students.

Previously, when this proposal was referred to the students, they did not take it seriously and hence there was no positive response. But, now a group of about 16 to 18 students of Sem. 8 class have shown keen interest and have given their oral consent for the training program on Saturdays and Sundays after 10<sup>th</sup> February 2016.

The representative of M/s. Dexter Technology Solutions has agreed to charge Rs. 3000/- (Rs. Three thousand only) as training charges for each candidate for a training duration of total forty hours.

Now, since the departmental laboratory namely the institutional infrastructure is being used while offering the software training, the other financial implications is required to be sorted out.

Thus, it is requested to issue necessary guidelines for conducting this proposed software training program after looking into all the necessary implications.

**Certificate Course in Project Based Learning for Electronics Engineering**

**Overview of Institute and Department:**

Rayat Shikshan Sanstha's Karmaveer Bhaurao Patil College of Engineering Satara, established in 1983 has created its unique identity by the way of imparting multiple opportunities to students for acquiring quality education and making all round development of their inner traits. The institute is approved by AICTE; New Delhi recognized by DTE, Govt. of Maharashtra and affiliated to Shivaji University, Kolhapur. The institute, at present offers four undergraduate programs such as Mechanical, Civil, Electronics, Computer and two post graduate programs Mechanical, production and Electronics engineering.

The Electronics Engineering Department is one of the well established department since 1983, having recognized faculty and well equipped laboratory facilities with necessary computing facilities.. The department is putting lot of efforts towards building of cognitive skills such as ability to analyze, logical reasoning, ability to evaluate and create, and ability to solve problems in technical graduates. Application of new technology in various fields is one of the main focuses in the activities of the department. Department has research laboratory for PG and PhD aspirants.

**About the Certificate Course:**

Project Based Learning for Electronics Engineering is an initiative of the Electronic Engineering Department to bring a technological transformation among students. By presenting student with a mix of choice and responsibility, cognitive concepts and practical activities, within an environment of real-world authenticity, projects students engage themselves to acquire knowledge of various concepts in depth in accordance with the industrial needs..

Students work on a project over an extended period of time that engages them in solving a real-world problem or answering a complex question. They demonstrate their knowledge and skills by developing a product or presentation for a real audience. As a result, students develop deep content knowledge as well as critical thinking, and creativity in the context of doing an authentic and meaningful project. Project Based Learning unleashes a contagious, creative energy among students and faculty members.

The objective of this course is to develop a solid understanding of current electronic concepts and extend the thought process of individual up to product level. This course will help students to speed up on the fundamental principles of electronics components, their operation and various other areas such as microcontrollers, wireless networks etc.

Q.40]

```
a = 4.5
```

```
b = 2
```

```
print a//b
```

Answer: 2.0

Explanation : This type of division is called truncating division where the remainder is truncated or dropped.

Q.41]

```
a = True
```

```
b = False
```

```
c = False
```

```
if a or b and c:
```

```
    print "GEEKSFORGEEKS"
```

```
else:
```

```
    print "geeksforgeeks"
```

Answer: GEEKSFORGEEKS

Explanation : In Python, AND operator has higher precedence than OR operator. So, it is evaluated first. i.e, (b and c) evaluates to false. Now OR operator is evaluated. Here, (True or False) evaluates to True. So the if condition becomes True and GEEKSFORGEEKS is printed as output.
