Collegiate Mentor Program

mentor

ADVISER | FRIEND | TUTOR | TEACHER | COACH | GUIDE

CHANGE THE ODDS. **BE A MENTOR.**

Mentoring Manual

1. Introduction

Mentoring is a great way to apply your knowledge and make a difference in students' lives. Collegiate mentor program provide guidance for a meaningful mentor relationship.

2. Mentor Program Expectations

The following are guidelines that will help you to have a successful mentoring partnership.

Maintain regular contact: Mentors and students should commit to speaking a minimum of once in a week. Although email is an important tool in mentoring, it cannot be substituted for actual, real-time conversation. Conversations may occur over the phone, via Skype (or similar software), and/or in person when possible.

Set clear and realistic goals: At the start of the mentoring partnership, mentors and students will have a conversation that addresses goals for both the mentor and student. Evaluate progress toward your goals.

Be responsive: Both mentors and students are expected to return calls and e-mails in a timely manner to each other.

Receive feedback: It is important that students be open to receiving feedback that is candid and delivered in a thoughtful and constructive way. If necessary, your mentor will help you learn how to receive and respond to feedback by modeling the behavior through open discussion.

Participate in self-reflection and self-development: Expect thought-provoking questions designed to help students understand and articulate motivations, accomplishments, weaknesses, etc.

Honor commitments: If a mentoring conversation must be canceled, it is expected that you and your mentor will do your best to communicate in advance of the meeting and reschedule.

Evaluate: At the end of the semester, both participants will be asked to complete an evaluation survey.

3. Mentoring Goals

- Develop professional expertise of student in a specific area of focus.
- Work on a specific academic goal of a student such as a research project or grant proposal.
- Develop leadership abilities of the student.
- Develop communication skills of the student.
- Explore personal interests and abilities of the student.
- Guide the student about how to handle college-life-work balance.
- Explore future career paths and opportunities for the student.
- Practice resume and cover letter writing or interview skills.

4. Mentoring Skills For Mentors

Highlighted below are the important skills that will help you empower your student to think, reflect, and take the necessary action steps to realize his or her goals. Your objective should be to provide guidance and support.

Actively listen

Active listening is a communication technique that requires the listener to paraphrase what he or she has heard the speaker say in order to confirm understanding. At the same time, the listener is also paying attention to non-verbal cues such as silence, facial expression, body language, and overall comfort.

For example, you may notice that every time you bring up the topic of graduation your student grows quiet and withdraws. You may address these cues with an open-ended question such as, "I notice that every time I bring up graduation you seem uncomfortable. What are your feelings about this transition?"

Tips for active listening:

- Focus all of your attention on the student.
- Avoid distractions like cell phones, email, etc.

- Select a quiet place to speak.
- Do not interrupt the student or assume a conclusion before the student has finished.
- Do not react with judgment. Instead, summarize main points once the student is finished using phrases like, “What I heard you say is” or, “Let me summarize your points to make sure that I heard you correctly.”
- Use “I” statements instead of “you” statements when going over what you heard. For example, “I felt uncomfortable by your statement” instead of, “You made me feel uncomfortable when you said . . .”
- Take notes to capture important thoughts and concepts.
- Resist the urge to provide solutions.
- Listen for feeling and tone in speech, and watch for non-verbal cues.

Ask thought-provoking questions

Your main goal as a mentor is to help your student take the steps needed to pursue his or her goals. Use open-ended questions that provoke deep thought and reflection. Your questions should create a space for open discussion and allow your student to reflect on his or her opinions, thoughts, and feelings. Open-ended questions encourage participation, stimulate discussion, and help you establish rapport. For example, instead of asking, “Are you enjoying your classes?” ask, “What is it that you enjoy most about your classes?” You can follow up with a, “Why?” or, “Why not?”

Sample Questions:

- i. What would you like to accomplish (before we meet next time)?
- ii. What has happened since we last met? Where are you now?
- iii. What did you learn (from an experience, about yourself, about others, about a situation)?
- iv. What will you do with this knowledge?
- v. What steps do you plan to take to accomplish those goals? How are you going to get there?

- vi. What resources will you need?
- vii. What barriers or challenges can you anticipate?
- viii. What is the situation/problem/issue? Sample questions continued
- ix. What do you think is the cause?
- x. What have you done so far to address it?
- xi. What has worked so far? What has not worked?
- xii. What could you do (differently) to get your desired result?
- xiii. How can I help you to be successful?
- xiv. What went well? What needs work?

Role model behavior

As a mentor you are a role model and should be aware of your word choice, your demeanor, and how you react to people and situations. Keep in mind that your student looks to you for advice and guidance so make sure that you practice what you preach. Ask yourself, “Would I want my student to see me behaving this way?” or, “Would I want my student to emulate these actions?”

Tips to practice role modeling with your mentee:

- Use examples from your own experiences to demonstrate how to receive feedback, take ownership, build effective partnerships, provide constructive criticism, etc.
- Model how to effectively receive and respond to feedback when receiving it from your mentee.
- Model active listening when your mentee is speaking.
- Be present, prepared, engaged, and on time to meetings with your student.

Provide objective feedback and guidance

College students do not have much experience receiving critical feedback and therefore may not have the personal or professional skills to appropriately

receive it and respond to it. As a result, it is important that you take the opportunity to provide feedback and guide your student through this type of conversation.

Tips for providing feedback:

- Ask your mentee how he or she best receives feedback in your first meeting. When you are ready to provide feedback, check for a willingness to listen by asking for permission to deliver feedback. Make sure the other person is in the frame of mind to receive it.
- Check for understanding. Make sure that you accurately understand the situation before jumping to a conclusion. Utilize your active listening skills.
- Check for positive intent. Make sure that your intentions are to help with the other person's growth and development and are not related to any personal bias or feelings you may have about the person.
- Focus on behaviors and results. Frame your message around concrete behaviors and results of those behaviors.

Demonstrate critical thinking

When you provide feedback to your student you model your ability to think critically about the situation. A critical thinker clearly articulates a question or problem, gathers and assesses relevant information, tests solutions against relevant criteria, has an open mind to alternative solutions, and communicates the decision effectively to others. Your mentee is honing these skills every day in the classroom and your job as a mentor is to help him/her learn to apply these skills to his or her life.

Steps to critical thinking:

- Identify the problem
- Identify possible solutions to the problem
- Analyze/evaluate possible solutions
- Make a decision and implement the solution
- Reflect on what happened and why

Mentor-Mentee Minutes of Meeting

Name of the Mentor Mrs. Dipali Chhatge

Program with code: Computer Sci & Engg. Academic Year: 2018-19.

Sem: II Class: TE CSE Date of meeting: 5/2/2019

Agenda of meeting:

- About college level activities
- Unit test preparation.
- Any other topic ~~with~~ from students.

Minutes of the Meeting:

- Students are informed about the college level activities like sports, cultural and guest - paper presentation technical events etc.
- Students are encouraged to participate into these competition.
- Unit tests schedules and study plans are discussed

Program with code: PE - 62706 Academic Year: 2018-19

Sem: I Class: B.E. Date of meeting: 20/08/2018

Agenda of meeting:

To discuss problems of students regarding their problems related to Academic facilities provided to student by institute/college.

Minutes of the Meeting:

We discuss following points -

- ① Cleanliness in classrooms & laboratories
- ② Internet facilities
- ③ Study material available in library
- ④ online courses of various subjects.
- ⑤ ~~④~~ ⑤ Difficulties arrived to students while studying specific subject.
